OVING NEIGHBOURHOOD PLAN

Post-Regulation 14 Mapping Changes

May 2025

As part of our agreed work on the project, ONH will make the following changes to the various policy maps in response to representations received during the Regulation 14 consultation:

1. General Changes

1.1 Revise the colouring used on the maps where appropriate to make it easier to distinguish between designations

2. OV1 Employment

2.1 As acknowledged by the SG, some of the points in the Reg 14 Report have not been actioned/decided upon, some of which may result in mapping changes. It would be helpful if the SG could inform ONH of their decision on this or make a note that this needs to be changed later on. The most relevant example of this is the following from the Reg 14 Report:

> *'3.16 CDC has suggested that the wording of Clause A III should be amended to improve clarity.* ***It is therefore recommended that the SG discusses with ONH how they would like to proceed with this. There are options for incentivising low carbon building developments, but this will require some further thought as such policies are often challenged at the examination stage.'***

3. OV4 Green Infrastructure Network

3.1 Wildlife corridor on the individual policy map does not match that of the main policy map

For best visual presentation, all policy designations are shown on the main policy map with individual policy maps provided under the supporting text of all relevant policies. Chichester District Council (CDC) pointed out in their Reg 14 rep that the Wildlife Corridor shown on the main policies map is different to that which is shown on the individual Policy OV4 map. The OV4 map will be updated so that the Wildlife Corridor is consistent

4. OV5 Local Green Spaces

4.1 Labels will be added to the Policy OV5 map so that the individual Local Green Spaces can be distinguished between each other

5. OV6 Grade 1 & 2 Agricultural Land

5.1 In its current appearance, the Policy OV6 map appears to be missing its key. This is more of a formatting issue with the page as a small section of the key appears to be visible, but the majority of it is cut off at the bottom of the page. Therefore, it is simply a case of moving the map up the page slightly, or onto the next one so that the full map key becomes visible

6. OV8 Dark Skies

6.1 There is a map under Policy OV8 which does not have a key. This map was not produced by ONH and it looks like it was possibly made in Parish Online. Therefore, it would be helpful if a member of the SG with access to Oving's Parish Online account could provide a replica of this map, but with a key included alongside it

7. OV9 Active and Sustainable Travel Network

7.1 The proposed footpaths shown on the main policies map were not shown on the Policy OV9 individual map. This will be updated for consistency

7.2 There has been significant opposition to the proposed cycle route through the Wildlife Corridor. At the SG meeting on the 28th March, the SG discussed an alternative route. ONH does not have a record of this and requests that the SG provides this so the updated route can be plotted on the map

8. OV12 Local Heritage Assets

8.1 Labels will be added to the Policy OV12 map so that the individual Local Heritage Assets can be distinguished between each other
